1. This action is in response to the amendment communication filed on December 20, 2004.

Reason for Allowance

2. The following is an examiner's statement of reasons for allowance:

Claims 1-31 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests a method for automatically determining an embedded runout correction threshold for each of the provided disk drives on a drive-by-drive basis. It is noted that, the closest prior art, Melrose et al (USPN 6,549,362) teaches on how to cancel written-in repetitive runout in non-ideal tracks written on a disk surface of a disk drive, e.g., by determining embedded runout correction values. However, Melrose et al fails to disclose determining an embedded runout correction threshold.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
